Your Roots Are Showing-Elise Chidley 2008-10-29 Lizzie Buckley has a life many women dream of - a gorgeous husband, a beautiful home and darling (when they're not fighting) three-year-old twins. But ever since the birth of her children, she's had a fantasy about locking herself in her bedroom for twenty-four hours with a good book and a box of chocolates. Unfortunately, her husband James doesn't understand her feelings. And when Lizzie unburdens herself in a flaming email to her sister Janie, then hits send at the wrong moment and accidentally shoots it off to James instead, her fairytale life gets a big dose of reality. With the word "divorce" ringing in her ears, Lizzie finds herself moving out and embarking on a totally different life - working hard to reinvent herself as a runner, a gardener, and a writer of children's books. But despite transforming her body, her neglected career, and her libido (courtesy of the local landscape gardener), Lizzie can't get over her soon-to-be ex. As Lizzie discovers, sometimes the fairytale ending is just the beginning of the real story.

Phenotyping; From Plant, to Data, to Impact and Highlights of the The International Plant Phenotyping Symposium - IPPS 2018-Trevor Garnett 2021-01-19
Eastern Regional Research Center Research Highlights 2000-2010, Issued April 2012- 2012
From These Roots-Sandra E. McBride 2019-08-21 In From These Roots, Sandra E. McBride presents a collection of articles she has had published in The Express weekly newspaper here in her hometown area of Mechanicville/Stillwater/Schaghticoke and Halfmoon in Upstate New York. Likening life within our communities to the growth of a tree, she begins with the fascinating history which shows “the roots” of this area. She moves on to “the strong trunk” which represents the people who have had an amazing impact on her hometowns, a foundation of sorts which raises us up. In “branches reach out” she tells of those incidents and memorable occasions which show our spreading out to appreciate all that we experience. In “the leaves that grow”, she depicts the members of our communities who have provided plenteous deeds with their efforts making this a great place to live. In the “blossoms that go forth on the breeze”, she has shown how in moving on from our own hometowns, we have experienced the wider world, and therein gained a new appreciation of all we have. In her epilogue, she speaks of special cherished memories of places and times she will forever hold dear in her heart.
Highlights of Natural Resources Management-United States. National Park Service 1992
Exploring Life Science- 2000 Exploring Life Science is a thoroughly up-to-date 11-volume set specially created to provide reference support for the science curriculum in grades 4-6. It reflects today’s increasing interest in the environment and includes a wide range of exciting new scientific advances -- especially in the field of medicine. Written in clear, understandable language, the text is complemented by detailed full-color illustrations and photographs, making this set attractive to younger students not only for use in completing their reports and research assignments, but also to pursue general interest in the life sciences.
Queer Roots for the Diaspora-Jarrod Hayes 2016-08-11 Uses comparative narratives to explore the dualism between marginalization and the desire for roots within a rooted identity
How to Be a Redhead-Adrienne Vendetti 2016-04-12 The Essential Guide to Becoming Your Most Radiant, Redheaded You If you have red hair, you know it’s more than just a color—it’s a way of life that comes with its own challenges, like unique makeup needs, fashion questions and hair dilemmas. How to be a Redhead has the answers to all your redhead beauty questions, with specialized advice and tips for hair care, skincare, makeup, health and fashion. With this book, redheads get: - The best products, tools and tips to keep your hair stunning and your complexion clear - Easy step-by-step hairstyle tutorials - Tips for nourishing your sensitive skin throughout the year - Effortlessly cool day-to-night makeup looks - How to achieve the perfect red lip - Redhead fashion dos and don’ts - How to look and feel your best Written by redheads, sisters and starters of the Red Hair Revolution, Adrienne & Stephanie Vendetti, How to be a Redhead is packed full of all the inspiration and advice a redhead could ever want. With this must-have book, you’ll learn to rock your red head with confidence, grace and glowing beauty.

Back to the Roots-Albrecht Schnabel 2012 There has now been more than a decade of conceptual work, policy development, and operational activity in the field of security sector reform (SSR). To what extent has its original aim, to support and facilitate development, been met? The various contributions to this book address this question, offering a range of insights on the theoretical and practical relevance of the security-development nexus in SSR. They examine claims of how and whether SSR effectively contributes to achieving both security and development objectives. In particular, the analyses presented in the book provide a salutary lesson that development and security communities need to take each other’s concerns into account when planning, implementing, and evaluating their activities. The book offers academics, policy-makers, and practitioners within the development and security communities relevant lessons, suggestions, and practical advice for approaching SSR as an instrument that serves both security and development objectives. (Series: Geneva Centre for the Democratic Control of Armed Forces [DCAF])

Frontiers in Plant Science: 2020 Highlights-Frontiers in Plant Science Editorial Office 2021-04-30 The Editorial Office of Frontiers in Plant Science would like to thank all the Chief Editors, Associate Editors and Review Editors that played an integral part in Frontiers’ innovative Collaborative Peer-Review process in 2020. In particular, we would like to recognize and thank Prof. Joshua L. Heazlewood – our now former Field Chief Editor, for his commitment, support and enthusiasm for the Plant Science field. Josh’s dedication and leadership has helped Frontiers in Plant Science become the most cited journal in the field with a strong editorial community. Looking forward, we’re excited to welcome Prof. Yunde Zhao, as our new Field Chief Editor in 2021. Having been with Frontiers in Plant Science since 2017, Yunde has contributed extensively to the development of the journal and will continue to ensure the journal goes from strength to strength.

The Other Roots-Pedro Meira Monteiro 2017-10-30 First published in 1936, the classic work Roots of Brazil by Sérgio Buarque de Holanda presented an analysis of why and how a European culture flourished in a large tropical environment that was totally foreign to its traditions, and the manner and consequences of this development. In The Other Roots, Pedro Meira Monteiro contends that Roots of Brazil is an essential work for understanding Brazil and the current impasses of politics in Latin America. Meira Monteiro demonstrates that the ideas expressed in Roots of Brazil have taken on new forms and helped to construct some of the most lasting images of the country, such as the “cordial man,” a central concept that expresses the Ibero-American cultural and political experience and constantly wavers between liberalism’s claims to impersonality and deeply ingrained forms of personalism. Meira Monteiro examines in particular how "cordiality" reveals the everlasting conflation of the public and the private spheres in Brazil. Despite its ambivalent relationship to liberal democracy, Roots of Brazil may be seen as part of a Latin Americanist assertion of a shared continental experience, which today might extend to the idea of solidarity across the so-called Global South. Taking its cue from Buarque de Holanda, The Other Roots investigates the reasons why national discourses invariably come up short, and shows identity to be a poetic
and political tool, revealing that any collectivity ultimately remains intact thanks to the multiple discourses that sustain it in fragile, problematic, and fascinating equilibrium.

The Expressionist Roots of Modernism—Peter Lasko 2003 This book challenges the commonly held view that Paris is where Modern Art was created. It refutes the assertion that Picasso and Matisse were the creators of the modern movement, and that it was not in France but in Germany between 1906 and 1914 that artists took the fundamental steps, intellectually as well as artistically, that were to determine the course art was to take for the rest of the century. It was the Russian émigré in Munich, Vassily Kandinsky, who first argued the case for total abstraction in art and for a total right of self-expression. This led directly to non-objective painting, to the nihilism of Dada, and eventually to the post-1945 New York School. The author shows that artists have long gone beyond abstraction in their exploitation of that search for originality, granted to them by the theoretical position taken up in the second decade of the 20th century in Germany.

Roots and Wings—Stacey York 2016-06-27 Use the updated activities, examples, and research to improve your anti-bias and multicultural education programs. This clear and practical guide includes expanded information on English language learners, family engagement, culturally responsive teaching, and staff training. Stacey York teaches child development at Rochester Community and Technical College and established E-LECT, a collaborative effort between thirteen Minnesota community and technical colleges to provide e-learning for early childhood teachers.

Highlights of Nitrogen Fixation Research—Esperanza Martínez 2012-12-06 For 31 years, the North American Symbiotic Nitrogen Fixation Conference (formerly Rhizobium Conference) has been a forum for scientists and graduate students to discuss their research advances, extending from basic aspects to agricultural applications, and dealing with topics ranging from bacterial genetics and metabolism to plant genetics and physiology. Nitrogen fixation, being a major life-supporting process on this planet, has attracted the interest of researchers for more than one century. Nitrogen fixation is responsible for the conversion of “inert” dinitrogen (N2) gas from the atmosphere into usable ammonia, replacing the fixed nitrogen constantly being lost to the atmosphere by the denitrification process. Worldwide agricultural productivity is determined by the availability of fixed nitrogen in all its forms, which the continually increasing human population depends upon for survival. An international momentum is developing in the use of biofertilizers to improve legume and non-legume crop yields and in the study of genomics in this area. New studies are being undertaken in several laboratories to study novel nitrogen-fixing systems, including non-legume crops. The North American Conferences on Symbiotic Nitrogen Fixation have periodically chronicled the advances in our knowledge of this area. For the first time, this conference was held in Mexico. Thus, all three North American countries have been hosts for this event. This year conference brought nearly 200 scientists from 18 different countries presenting lectures and over 80 posters.

Back to the Roots: A Definitive Guide to Grassroots & Football Development—Shaji Prabhakaran 2017-04-19 The book presents an insight into football development and every aspect of it is comprehensively covered with a special focus on grassroots football. Back to the Roots illustrates in detail the player development process, underlining and envisaging key aspects required for the successful and sustainable player development pathway. It highlights the importance of football in schools and training academies for young talent. The author, being associated with the game and its development for many years, presents a road-map for making football an integral part of the school education system. With an emphasis on the role of leadership in football development for bringing in a change or developing the game from every aspect, this book is a must read for everyone involved with the beautiful game—be it budding players, administrators, fans, policy makers, parents, coaches as well as young and old enthusiasts of the game.

updated examination of current evaluation theories and traces their evolution. Marvin C. Alkin shows how theories build upon theories and how the theories are related to each other. The way in which these evaluation "roots" grew to form a tree helps to provide a better understanding of evaluation theory. In addition to the editor's overview, the book contains essays by leading evaluation theorists. In these pieces, the evaluators comment on their own development and give their views of their placement upon the tree. **All royalties from sales of this book are donated to support the AEA Research on Evaluation Student Award.**

Stubborn Roots-Prudence L. Carter 2012-05-01 What are the features of the school environment that make students' of color incorporation greater at some schools than at others? Prudence L. Carter seeks to answer this basic but bedeviling question through a rich comparative analysis of the organizational and group dynamics in eight schools located within four cities in the United States and South Africa-two nations rebounding from centuries of overt practices of racial and social inequality. Stubborn Roots provides insight into how school communities can better incorporate previously disadvantaged groups and engender equity by addressing socio-cultural contexts and promoting "cultural flexibility." It also raises important and timely questions about the social, political, and philosophical purposes of multiracial schooling that have been greatly ignored by many, and cautions against narrow approaches to education that merely focus on test-scores and resources. "There are simply not enough texts that look comparatively at the two foremost experiments with questions of race, culture, and class in the English-speaking world, the United States and South Africa. Prudence Carter's work is simultaneously scholarly and compassionate. It helps us see, in these two benighted but globally important societies, how easily things break, but also how well, when structures are in place and when human agency takes flight, individuals and the groups to which they belong flourish and grow." - Crain Soudien, Professor of Education, University of Cape Town "In this ambitious mixed-method study, Carter analyzes the social and symbolic boundaries that account for disparate educational experiences by race in the United States and South Africa. Resources are only part of the answer; equally important, she argues, are the cultural and institutional conditions that make students feel they are valued contributors of the community. Thus, school policies about hairstyle, dress codes, tracking, extracurricular activities, and language use are among the important dimensions that enable or discourage engagement in students. Educators, policymakers, and scholars alike have much to learn from this agenda-setting work." - Michele Lamont, Harvard University Author of The Dignity of Working Men: Morality and the Boundaries of Race, Class and Immigration "Prudence Carter's remarkable book shines a light on the often invisible patterns that perpetuate educational disparity in both the United States and South Africa. Stubborn Roots reveals how racial and ethnic divides are often reinforced, even in supposedly 'integrated' schools and even when many people of good will, try to eradicate them. Carter's insights illuminate how educators and schools can address these issues by becoming increasingly attuned to the socio-cultural worlds in which their students live. This book paves the way for the changes needed for historically disadvantaged groups to receive equitable, high-quality educations." - Linda Darling-Hammond, Charles Ducommun Professor of Education, Stanford University

Design Roots-Stuart Walker 2018-02-08 Design Roots provides a comprehensive review of culturally significant designs, products and practices which are rooted to particular communities through making tradition and a sense of place. Many rich traditional practices associated with community, tacit knowledge and culture are being rapidly lost due to globalisation and urbanisation. Yet they have much to offer for the future in terms of sustainability, identity, wellbeing and new opportunities in design. This book considers the creative roots, the place-based ecologies, and deep understandings of cultural significance, not only in terms of history and tradition but also in terms of locale, social interactions, innovation, and
change for the sustainment of culturally significant material productions. Importantly, these are not locked in time by sentimentality and nostalgia but are evolving, innovative, and adaptive to new technologies and changing circumstances. Contributing authors explore the historical roots of culturally significant designs, products and practices, emerging directions, amateur endeavours, enterprise models, business opportunities and the changing role and contribution of design in the creation of material cultures of significance, meaning and value. An international perspective is provided through case studies and research from North and South America, Africa, Europe, Asia and Australasia, with examples including Aran jumper production in Northern Ireland, weaving in Thailand, Iranian housing design, Brazilian street design and digital crafting in the United Kingdom.

Grass Roots-Emily Dufton 2017-12-05 How earnest hippies, frightened parents, suffering patients, and other ordinary Americans went to war over marijuana In the last five years, eight states have legalized recreational marijuana. To many, continued progress seems certain. But pot was on a similar trajectory forty years ago, only to encounter a fierce backlash. In Grass Roots, historian Emily Dufton tells the remarkable story of marijuana's crooked path from acceptance to demonization and back again, and of the thousands of grassroots activists who made changing marijuana laws their life's work. During the 1970s, pro-pot campaigners with roots in the counterculture secured the drug's decriminalization in a dozen states. Soon, though, concerned parents began to mobilize; finding a champion in Nancy Reagan, they transformed pot into a national scourge and helped to pave the way for an aggressive war on drugs. Chastened marijuana advocates retooled their message, promoting pot as a medical necessity and eventually declaring legalization a matter of racial justice. For the moment, these activists are succeeding--but marijuana's history suggests how swiftly another counterrevolution could unfold.

Passion, Betrayal and Killer Highlights-Kyra Davis 2012-06-15 Sophie Katz has just offered a man $12,000 for his services... Is she desperate or just meshugeneh? Considering the kind of disasters that usually befall the half-black, half-Jewish mystery writer, probably both. Because the last time Sophie saw sexy P.I. Anatoly Darinsky, he practically danced a jig when she waved goodbye &151; a normal reaction for a man who'd nearly bought the farm trying to protect her from her own foolishness. What are the chances he'd agree to take incriminating pictures of her sister's philandering husband? Or that he'd let her tag along &151; you know...for research? But when her brother-in-law turns up dead and her sister becomes the prime suspect, Sophie's priority is finding the real killer. With or without Anatoly's help. Her brother-in-law's secret life yields plenty of suspects, but the San Francisco police aren't taking any of them seriously. So Sophie does what comes naturally to her: she stirs up trouble (to lure the killer out, of course). But if her crazy plan works, will Anatoly be there to protect her this time?

Roots Entwine-Victoria Bastedo 2014-07-17 Hidden in the trees is a boy with a mysterious past and powerful ability- will the team that found him have to watch him die? 15-year-old Joaquin can sharpen his senses to an amazing degree, but then he needs to heal from the pain. His ability harms him but can help everyone else. He joins a mission team that works for the king and they travel south into danger. But entwining his life with his team moves Joaquin towards the inevitable choice he must make for them. Will his ability be a curse or the gift that saves his friends?

The Christian Roots of Individualism-Maureen P. Heath 2019-11-28 The modern West has made the focus on individuality, individual freedom, and self-identity central to its self-definition, and these concepts have been crucially shaped by Christianity. This book surveys how the birth of the Christian worldview affected the evolution of individualism in Western culture as a cultural meme. Applying a biological metaphor and Richard Dawkins’ definition of a meme, this work argues the advent of individualism was not a sudden innovation of the Renaissance or the Enlightenment, but a long evolution with characteristic traits. This evolution can be mapped using profiles of individuals in different historical eras who contributed to the modern notion of individualism. Utilizing excerpts from original works from Augustine to Nietzsche, a compelling narrative arises from the
slow but steady evolution of the modern self. The central argument is that Christianity, with its characteristic inwardness, was fundamental in the development of a sense of self as it affirmed the importance of the everyday man and everyday life.

The Roots of Religion-Roger Trigg 2016-02-24 The cognitive science of religion is a new discipline that looks at the roots of religious belief in the cognitive architecture of the human mind. The Roots of Religion deals with the philosophical and theological implications of the cognitive science of religion which grounds religious belief in human cognitive structures: religious belief is ‘natural’, in a way that even scientific thought is not. Does this new discipline support religious belief, undermine it, or is it, despite many claims, perhaps eventually neutral? This subject is of immense importance, particularly given the rise of the ‘new atheism’. Philosophers and theologians from North America, UK and Australia, explore the alleged conflict between truth claims and examine the roots of religion in human nature. Is it less ‘natural’ to be an atheist than to believe in God, or gods? On the other hand, if we can explain theism psychologically, have we explained it away. Can it still claim any truth? This book debates these and related issues.

Beltsville Area Research Highlights- 1998

The Spiritual Roots of the Tarot-Russell A. Sturgess 2020-09-22 Learn the path to enlightenment and inner peace encoded by the Cathar in the Major Arcana of the Marseille Tarot • Reveals how the secret wisdom teachings of the heretical Cathar sect were hidden in plain sight in the imagery of the Major Arcana of the Marseille Tarot deck • Decodes each of the cards in detail and shows how they offer clear instructions for recalibrating human consciousness and achieving enlightenment • Shares the author’s self-development program, based on the wisdom of the cards, for creating a lifestyle filled with peace, joy, good health, and meaning The Holy Grail has been discovered. Not a cup or chalice as myth leads us to believe, the Holy Grail is sacred knowledge of the path to enlightenment and inner peace. While author Russell Sturgess was conducting research on the Marseille Tarot, he found evidence that this tarot deck, while masquerading as a simple card game, held the teachings of an ancient heretical religious group from southern France, the Cathar, believed to be the keepers of the Holy Grail. To avoid persecution by the papacy, this sect used portable art like illuminations to convey their Gnostic Christian teachings, in the same way the stained glass windows of churches spoke to their congregations. This portable Cathar art then inspired the creation of the Tarot. After his breakthrough discovery of a hidden key on the Magician and Strength cards, Sturgess examined the Major Arcana cards further and used the key to unlock their symbolism, discovering clear instructions for recalibrating human consciousness and achieving enlightenment, with specific cards representing pivotal points in making the journey from ignorance to awareness. Decoding the cards in detail, the author shows how they reveal a journey of transformed consciousness that can result in finding what the Cathar called “the kingdom of heaven.” Calling this sacred knowledge “the Cathar Code,” Sturgess reveals his personal development program based on the Code that opens access to a meaningful lifestyle filled with peace and joy and that naturally fosters health and well-being. He shows how these teachings offer a clear path that transforms a life burdened by fear of failure, rejection, and scarcity into one with clarity of purpose, self-honoring, kindness, and the abundance that comes with making a fulfilling difference in the world.

Recovered Roots-Yael Zerubavel 1995 Because new nations need new pasts, they create new ways of commemorating and recasting select historic events. In Recovered Roots, Yael Zerubavel illuminates this dynamic process by examining the construction of Israeli national tradition. In the years leading to the birth of Israel, Zerubavel shows, Zionist settlers in Palestine consciously sought to rewrite Jewish history by reshaping Jewish memory. Zerubavel focuses on the nationalist reinterpretation of the defense of Masada against the Romans in 73 C.E. and the Bar Kokhba revolt of 133-135; and on the transformation of the 1920 defense of a new Jewish settlement in Tel Hai into a national myth. Zerubavel demonstrates how, in each case, Israeli memory transforms events that ended in death and defeat into heroic myths and symbols of national revival. Drawing on a broad range of
official and popular sources and original interviews, Zerubavel shows that the construction of a new national tradition is not necessarily the product of government policy but a creative collaboration between politicians, writers, and educators. Her discussion of the politics of commemoration demonstrates how rival groups can turn the past into an arena of conflict as they posit competing interpretations of history and opposing moral claims on the use of the past. Zerubavel analyzes the emergence of counter-memories within the reality of Israel’s frequent wars, the ensuing debates about the future of the occupied territories, and the embattled relations with Palestinians. A fascinating examination of the interplay between history and memory, this book will appeal to historians, sociologists, anthropologists, political scientists, and folklorists, as well as to scholars of cultural studies, literature, and communication.

S Chand's Social Sciences Class IX-N K CHOWDHRY

S. Chand's Social Sciences for Class IX is based on the latest syllabus. It is thoroughly revised by incorporating additions as per the Modified Structure of Examination Scheme. The entire subject matter is divided into two parts — Part I and Part II individually.

African Roots, Brazilian Rites-C. Sterling 2012-09-06

This text explores how Afro-Brazilians define their Africanness through Candomblé and Quilombo models, and construct paradigms of blackness with influences from US-based perspectives, through the vectors of public rituals, carnival, drama, poetry, and hip hop.

Routes and Roots-Elizabeth DeLoughrey 2009-12-31

Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean (‘tidalectic’) to destabilize the national, ethnic, and even regional frameworks that have been the mainstays of literary study. The result is a privileging of alter/native epistemologies whereby island cultures are positioned where they should have been all along—at the forefront of the world historical process of transoceanic migration and landfall. The research, determination, and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature. —Vilsoni Hereniko, University of Hawai‘i "Elizabeth DeLoughrey brings contemporary hybridity, diaspora, and globalization theory to bear on ideas of indigeneity to show the complexities of ‘native’ identities and rights and their grounded opposition as ‘indigenous regionalism’ to free-floating globalized cosmopolitanism. Her models are instructive for all postcolonial readers in an age of transnational migrations." —Paul Sharrad, University of Wollongong, Australia

Routes and Roots is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue. Taking the "tidalectic" between land and sea as a dynamic starting point, Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots. The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging, theorizing the transoceanic imaginary. The second section turns to the land to examine indigenous epistemologies in nation-building literatures. Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered, exploring how masculine travelers are naturalized through their voyages across feminized lands and seas. This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel, positioning island cultures in the world historical process. In fact, DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropoles that deemed them peripheral to modernity. Fresh in its ideas, original in its approach, Routes and Roots engages broadly with history, anthropology, and feminist, postcolonial, Caribbean, and Pacific literary and cultural studies. It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines.

Roots of Social Sensibility and Neural Function-Jay Schulkin 2000

Throughout the book, he incorporates neurobiological evidence for a domain-specific system for social cognition."
Ideological, Cultural, and Linguistic Roots of Educational Reforms to Address the Ecological Crisis-C. A. Bowers 2018-05-04

In this volume C.A. (Chet) Bowers, whose pioneering work on education and environmental and sustainability issues is widely recognized and respected around the world, brings together a carefully curated selection of his seminal work on the ideological, cultural, and linguistic roots of the ecological crisis; misconceptions underlying modern consciousness; the cultural commons; a critique of technology; and educational reforms to address these pressing concerns. In the World Library of Educationalists series, international scholars themselves compile career-long collections of what they judge to be their finest pieces – extracts from books, key articles, salient research findings, major theoretical and/practical contributions - so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field, as well as the development of the field itself. Contributors to the series include: Michael Apple, James A. Banks, Joel Spring, William F. Pinar, Stephen J. Ball, Elliot Eisner, Howard Gardner, John Gilbert, Ivor F. Goodson, and Peter Jarvis.

The Vital Roots of European Enlightenment-Samar Attar 2007-10-23

The Vital Roots of European Enlightenment is a collection of essays which deal with the influence of Ibn Tufayl, a 12th-century Arab philosopher from Spain, on major European thinkers. His philosophical novel, Hayy Ibn Yaqzan, could be considered one of the most important books that heralded the Scientific Revolution. Its thoughts are found in different variations and to different degrees in the books of Thomas Hobbes, John Locke, Isaac Newton, and Kant. But if Ibn Tufayl's fundamental values, such as equality, freedom and toleration, which the thinkers of the European Enlightenment had adopted as theirs, paved the way to the French Revolution, they certainly marked the end of the age of reason in southern Spain and the rest of the Islamic world. Ibn Tufayl's philosophy was appropriated, subverted, or reinvented for many centuries. But the memory of the man who wrote such an influential book was buried in the dust of history. The Vital Roots of European Enlightenment reexamines Ibn Tufayl's momentous book and its continued influence over contemporary philosophy. This intriguing book will appeal to those interested in comparative literature and religion.

Democracy's Deep Roots-S. Schneider 2010-04-09

Does the democratic nation state remain a legitimate regime form in the current age of globalization? This book uses a novel, analytical approach to probe this topical question, drawing on a comparative study of legitimation discourses in the media of four Western democracies (Switzerland, Germany, Britain, and the United States.)

True Roots-Ronnie Citron-Fink 2019-06-04

Like 75% of American women, Ronnie Citron-Fink colored her hair. Yet as an environmental journalist, she knew all those unpronounceable chemical names on the back of the hair dye box were far from safe. So Ronnie decided to ditch the dye and go in search of answers. What are the risks of hair dye? Are there safer alternatives? Will I still feel like me when I have gray hair? True Roots follows her journey from dark dyes to a silver crown of glory, from fear of aging to embracing natural beauty. Along the way, women of all ages can learn to protect themselves from dangerous products and discover a new hair story–one built on individuality, health, and truth.

Personal Roots of Representation-Barry C. Burden 2015-02-18

Despite heightened partisanship in the U.S. Congress and constituencies split along ideological lines, congressional representatives frequently buck their parties and seldom do precisely what voters ask. In Personal Roots of Representation, Barry Burden challenges standard explanations of legislative preferences to emphasize the important role that personal influences play in representatives’ voting behavior. This timely book is the first to examine the extent to which the very same values, experiences, and interests that shape congressional members as individuals and guide their own life choices similarly shape their policymaking decisions. Burden takes a close look at legislative decision making in the areas of tobacco regulation, vouchers and school choice, and religion and bioethics. He finds that personal factors become more significant when legislators are acting proactively rather than reactively, grappling with specific policy issues, and defending rather than challenging the status quo. Marshaling both qualitative and quantitative evidence, Burden reveals that the personal roots of...
representatives' actions can be as influential as the usual suspects of partisanship and constituency--and that personal factors quite often have the greatest impact when the policymaking stakes are at their highest. Personal Roots of Representation is a provocative book that raises pressing new questions about legislative discretion and the accountability of our elected officials.

**How To Do Highlights Roots**

This is likewise one of the factors by obtaining the soft documents of this *how to do highlights roots* by online. You might not require more mature to spend to go to the book establishment as skillfully as search for them. In some cases, you likewise accomplish not discover the notice how to do highlights roots that you are looking for. It will unconditionally squander the time.

However below, as soon as you visit this web page, it will be in view of that completely easy to acquire as with ease as download lead how to do highlights roots

It will not give a positive response many era as we tell before. You can accomplish it while play in something else at home and even in your workplace. for that reason easy! So, are you question? Just exercise just what we give under as capably as review *how to do highlights roots* what you when to read!
