The Secret Life of Money-Tad Crawford 2020-10-06 The Secret Life of Money leads readers on a fascinating journey to uncover the sources of our monetary desires and, by understanding why money has the power to obsess us, free ourselves from destructive patterns and discover riches of the soul. This wide-ranging treatment of how money secretly influences our lives includes chapters on the many forms of money, why money is so easily worshipped, why money sometimes feels more important than life, hoarding money, the source of riches, inheritance, and the stock market. Crawford, a teller of entertaining tales, gathers stories and myths from around the world that help us understand why money is so much more than the useful tool that we may think it to be. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing
arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Art & Money-Irving Babbitt Professor of Comparative Literature and Professor of English and American Literature and Languageirving Babbitt Professor of Comparative Literature Marc Shell 1995-06 Examines the many material, social, and symbolic connections among art, money, and religion throughout Western history, and investigates current matters of art collection, counterfeiting, and crises in the financial world, with the help of many illustrations. Money of the Mind-James Grant 1994-05-01 The 1980s witnessed a lemming-like rush into the sea of debt on the part of the American industrial and financial communities, with consequences we are only beginning to appreciate. But the speculative frenzy of the eighties didn't just happen. It was the culmination of a long cycle of slow relaxation of credit practices--the subject of James Grant's brilliant, clear-eyed history of American finance. Two long-running trends converged in the 1980s to create one of our greatest speculative booms: the democratization of credit and the socialization of risk. At the turn of the century, it was almost impossible for the average working person to get a loan. In the 1980s, it was almost impossible to refuse one. As the pace of lending grew, the government undertook to bear more and more of the creditors' risk--a pattern, begun in the Progressive era, which reached full flower in the "conservative" administration of Ronald Reagan. Based on original scholarship as well as firsthand observation, Grant's book.
puts our recent love affair with debt in an entirely fresh, often chilling, perspective. The result is required—and wickedly entertaining—reading for everyone who wants or needs to understand how the world really works. "A brilliantly eccentric, kaleidoscopic tour of our credit lunacy... A splendid, tooth-gnashing saga that should be savored for its ghoulish humor and passionately debated for its iconoclastic analysis. It is a fitting epitaph to the credit binge of the '80s."--Ron Chernow, The Wall Street Journal.

Contemporary Issues in Branding-Pantea Foroudi 2019-12-16 This book provides students and academics with a comprehensive analysis of the theory and practice of branding. The challenge to explore new and effective ways of harnessing the power of communication to engage with company stakeholders in interactive, immediate and innovative ways is ever-present in the digital era. Digital marketing and social media create opportunities for managers to communicate their brand’s identity to their consumers and stakeholders. Yet, limited empirical research exists to elucidate these issues, and less still that assists our understanding of branding issues at an international level. Recognising the complexity and plurality at the heart of the branding discipline, this text explores the relationship between brands, identity and stakeholders. Working through building, designing and maintaining a brand, the authors consider such aspects as strategic planning and campaign management, research and measurement, media relations, employee communication, leadership and change communication, and crisis branding. Critically, differing methods and approaches applied to branding and communication research design are assessed, including both qualitative and quantative methods. Proposing a mixture of theory and practice with international case studies, this book is an invaluable companion for advanced undergraduate and postgraduate students, academics of marketing and strategic brand management, as well as managers and decision makers.

Building Type Basics for Banks and Financial Institutions-Homer Williams 2010-04-05 Essential information for the design of banks and financial institutions Building Type Basics for Banks and Financial Institutions is your one-stop reference for the essential information you need to confidently begin the design process and successfully complete the design for a bank or financial institution, large or small, on time and within budget. A renowned architect in the field shares his firsthand knowledge in order to guide architects, planners, engineers, and their clients through all aspects of the design of banking facilities. This comprehensive guide features a number of recently constructed and renovated banks—from small neighborhood branches to large headquarters. It highlights design issues as well as planning and zoning, office space versus customer space, and overall security. Building Type Basics for Banks and Financial Institutions begins with a basic overview of the history of banking and financial institutions, then explores the classic designs of the past along with the important considerations involved in building modern banks, including drive-up lanes, ATM facilities, and high-tech teller stations. This quick reference: Addresses key questions that arise when launching a banking facility design project Offers insight from an architect with more than forty years of experience in the design of more than one hundred banks Provides the best contemporary examples complete with photographs, diagrams, floor plans, sections, and details Not only does this book offer current, authoritative information, its comprehensive coverage and logical organization also save you countless hours of research. Building Type Basics books provide architects with the essentials needed to jump-start specialized facilities design. Each volume features
leading experts in the field who address the issues that shape the early phases of a project in a convenient, easy-to-use format. HOMER L. WILLIAMS, D.ARCH, FAIA, is principal of Williams Spurgeon Kuhl & Freshnock Architects (WSKF) in North Kansas City, Missouri. He has more than four decades of experience in the design of more than one hundred bank and financial service projects. He is a past president of the National Council of Architectural Registration Boards (NCARB), and received his doctorate in architecture at the University of Hawaii. Go Figure! New Directions in Advertising Rhetoric—Edward F. McQuarrie 2008 Rhetorical scholarship has found rich source material in the disciplines of advertising, communications research, and consumer behavior. Advertising, considered as a kind of communication, is distinguished by its focus on causing action. Its goal is not simply to communicate ideas, educate, or persuade, but to move a prospect closer to a purchase. The editors of "Go Figure! New Directions in Advertising Rhetoric" have been involved in developing the scholarship of advertising rhetoric for many years. In this volume they have assembled the most current and authoritative new perspectives on this topic. The chapter authors all present previously unpublished concepts that represent advances beyond what is already known about advertising rhetoric. In the opening and closing chapters editors Ed McQuarrie and Barbara Phillips provide an integrative view of the current state of the art in advertising rhetoric. Trust in Troubled Times—Brett Sheehan 2003 This timely book traces the development of banking and paper money in republican Tianjin in order to explore the creation of social trust in financial institutions. Framing the study around Bian Baimei, a conscientious branch manager of the Bank of China, Brett Sheehan analyzes the actions of bankers, officials, and local elites as they tried to overcome political and financial crises and instill trust in the banking system. After early failures in promoting trust, government authority as a regulator of the financial system...
gradually increased, peaking in 1935, when the state unified the money supply for the first time in several hundred years. Concurrently, when local elites proved unable to develop successful strategies to make people trust the system, their influence declined. The need for trust in increasingly complex financial arrangements redefined state-society relations, simultaneously enhancing state power and creating new constraints on the actions of both elites and governments. Trust in Troubled Times is a valuable new perspective on the economic, social, and political history of modern China.

A History of Architecture and Urbanism in the Americas-Clare Cardinal-Pett 2015-11-19 A History of Architecture and Urbanism in the Americas is the first comprehensive survey to narrate the urbanization of the Western Hemisphere, from the Arctic Circle to Antarctica, making it a vital resource to help you understand the built environment in this part of the world. The book combines the latest scholarship about the indigenous past with an environmental history approach covering issues of climate, geology, and biology, so that you'll see the relationship between urban and rural in a new, more inclusive way. Author Clare Cardinal-Pett tells the story chronologically, from the earliest-known human migrations into the Americas to the 1930s to reveal information and insights that weave across time and place so that you can develop a complex and nuanced understanding of human-made landscape forms, patterns of urbanization, and associated building typologies. Each chapter addresses developments throughout the hemisphere and includes information from various disciplines, original artwork, and historical photographs of everyday life, which - along with numerous maps, diagrams, and traditional building photographs - will train your eye to see the built environment as you read about it.

New Ways of Working-Nathalie Mitev 2021-03-26 This volume focuses on new ways of working, and explores implications of these new practices with a particular emphasis on the place
occupied by technology, materiality and bodies within contemporary working configurations. It draws together an international range of scholars to examine diverse subjects such as: the gig economy, social media as a work space, the role of materiality in living labs, managerial techniques and organizational legitimacy. Drawing on global perspectives, from France to Nigeria, this book presents a fascinating examination of the many new ways people are working, and relating to their work. Part of the esteemed Technology, Work and Globalization series, this book is valuable reading for scholars working on organizational studies, ethnography, technology management, and management more generally.

Technological Innovation in Retail Finance-Bernardo Batiz-Lazo 2010-11-23 This edited volume offers a new and original approach to the study of technological change in retail finance. Documenting developments in the US alongside case studies from Mexico and Europe, Technological Innovation in Retail Finance addresses the variety of financial institutions that populated the markets for retail finance. It offers a massive research base reflecting not only breadth of contributor interests, but also a unity of purpose that comes from several workshops and comments on each other's work. Technological innovation had a major role in the shaping and developing of administrative procedures, routines, and capabilities in organizations offering retail financial services. Indeed, with the exception of contemporary case studies for the UK, the current ‘state of the art’ in the study of the computerization of financial services from an historical perspective is overwhelmingly focused on developments in the USA. This volume overcomes the usual bias towards the so called ‘Atlantic continuity’ in the understanding of technological change related to applications of information and telecommunication technologies (ICT) by offering a number of sources of distinctiveness. It shows when and how technological change altered the competitive intensity in the markets for retail
finance.

Integrated Buildings-Leonard R. Bachman 2004-01-27 An "anatomical" study of building systems integration with guidelines for practical applications Through a systems approach to buildings, Integrated Buildings: The Systems Basis of Architecture details the practice of integration to bridge the gap between the design intentions and technical demands of building projects. Analytic methods are introduced that illustrate the value, benefit, and application of systems integration, as well as guidelines for selecting technical systems in the conceptual, schematic, and design development stages of projects. Landmark structures such as Eero Saarinen's John Deere Headquarters, Renzo Piano's Kansai International Airport, Glenn Murcutt's Magney House, and Richard Rogers's Lloyd's of London headquarters are presented as part of an extensive collection of case studies organized into seven categories: Laboratories, Offices, Pavilions, Green Architecture, High Tech Architecture, Airport Terminals, Residential Architecture. Advanced material is provided on methods of integration, including an overview of integration topics, the systems basis of architecture, and the integration potential of various building systems. An expanded case study of Ibsen Nelsen's design for the Pacific Museum of Flight is used to demonstrate case study methods for tracing integration through any work of architecture. Visually enhanced with more than 300 illustrations, diagrams, and photographs, Integrated Buildings: The Systems Basis of Architecture is a valuable reference guide for architecture and civil engineering students, as well as architects, engineers, and other professionals in the construction industry.

Sorting Out the New South City, Second Edition-Thomas W. Hanchett 2020-02-03 One of the largest and fastest-growing cities in the South, Charlotte, North Carolina, came of age in the New South decades of the late nineteenth and early twentieth centuries, transforming itself from a rural courthouse village to
the trading and financial hub of America's premier textile manufacturing region. In this book, Thomas W. Hanchett traces the city's spatial evolution over the course of a century, exploring the interplay of national trends and local forces that shaped Charlotte and, by extension, other New South urban centers. Hanchett argues that racial and economic segregation are not age-old givens but products of a decades-long process. Well after the Civil War, Charlotte's whites and blacks, workers and business owners, lived in intermingled neighborhoods. The rise of large manufacturing enterprises in the 1880s and 1890s brought social and political upheaval, however, and the city began to sort out into a "checkerboard" of distinct neighborhoods segregated by both race and class. When urban renewal and other federal funds became available in the mid-twentieth century, local leaders used the money to complete the sorting-out process, creating a "sector" pattern in which wealthy whites increasingly lived on one side of town and blacks on the other. A new preface by the author confronts the contemporary implications of Charlotte's resegregation and prospects for its reversal.

Sorting Out the New South City-Thomas W. Hanchett 2017-10-06

One of the largest and fastest-growing cities in the South, Charlotte, North Carolina, came of age in the New South decades of the late nineteenth and early twentieth centuries, transforming itself from a rural courthouse village to the trading and financial hub of America's premier textile manufacturing region. In this book, Thomas Hanchett traces the city's spatial evolution over the course of a century, exploring the interplay of national trends and local forces that shaped Charlotte, and, by extension, other New South urban centers. Hanchett argues that racial and economic segregation are not age-old givens, but products of a decades-long process. Well after the Civil War, Charlotte's whites and blacks, workers and business owners, all lived intermingled in a "salt-and-pepper" pattern. The rise of large manufacturing enterprises in the 1880s and 1890s brought social and political

Designing Commercial Interiors-Christine M. Piotrowski 2012-06-14 The definitive reference on designing commercial interiors—expanded and updated for today's facilities Following the success of the ASID/Polsky Prize Honorable Mention in 1999, authors Christine Piotrowski and Elizabeth Rogers have extensively revised this guide to planning and designing commercial interiors to help professionals and design students successfully address today's trends and project requirements. This comprehensive reference covers the practical and aesthetic issues that distinguish commercial interiors. There is new information on sustainable design, security, and accessibility—three areas of increased emphasis in modern interiors. An introductory chapter provides an overview of commercial interior design and the challenges and rewards of working in the field, and stresses the importance of understanding the basic purpose and functions of the client's business as a prerequisite to designing interiors. This guide also gives the reader a head start with eight self-contained chapters that provide comprehensive coverage of interior design for specific types of commercial facilities, ranging from offices to food and beverage facilities, and from retail stores to health care facilities. Each chapter is complete with a historical overview, types of facilities, planning and interior design elements, design applications, a summary, references, and Web sites. New design applications covered include spas in hotels, bed and breakfast inns, coffee shops, gift stores and salons, courthouses and courtrooms, and golf clubhouses. In keeping with the times, there are new chapters.
focusing on senior living facilities and on restoration and adaptive use. A chapter on project management has been revised and includes everything from proposals and contracts to scheduling and documentation. Throughout the book, design application discussions, illustrations, and photographs help both professionals and students solve problems and envision and implement distinctive designs for commercial interiors. With information on licensing, codes, and regulations, along with more than 150 photographs and illustrations, this combined resource and instant reference is a must-have for commercial interior design professionals, students, and those studying for the NCIDQ licensing exam. The Buildings of Main Street-Richard W. Longstreth 2000 The Buildings of Main Street is the primary resource for interpreting commercial architectural style. Richard Longstreth, a renowned and respected author in the field of historic preservation, presents a useful survey of commercial architecture in urban America. He has developed a typology of architectural classification for commercial application in American towns across the United States. Likely to be enjoyed by both students and members of the general public seeking an introduction to commercial architecture, The Buildings of Main Street makes a significant and lasting contribution to American architectural history.

Urban Landscapes-P. J. Larkham 2013-08-21 Taking a multidisciplinary approach this addresses the academic and practical issues concerning the present and future of the built environment, arguing for its enlightened management in the future of our present-day environment.
The Architecture of Andrew Thomas Taylor-Susan Wagg
2013-04-01 By the year 1900, architect Andrew Taylor had
designed Bank of Montreal branches across the continent and
much of McGill University, helped found the McGill School of
Architecture, and played a critical role in creating the first
professional organization for Quebec architects. In The
Architecture of Andrew Thomas Taylor, Susan Wagg presents a
groundbreaking study of the life and work of a major figure in
nineteenth-century Canadian architecture. Born in Edinburgh and
trained in Scotland and England, Taylor spent two decades in
Canada between 1883 and 1904, designing some of Montreal's
most iconic landmarks. Wagg places his career amidst the wealth
of opportunities provided by Canada's high society and captains
of industry. Taylor's Canadian relatives, Montreal's powerful
Redpath family, brought him into contact with the small group of
financiers and entrepreneurs who controlled Canada's destiny.
With the support of such influential patrons as Sir William
Macdonald and the Bank of Montreal, Taylor successfully
confronted dramatic changes in building technology as iron and
steel were increasingly used and buildings grew ever taller. He
innovatively adapted English and American styles to the Canadian
environment, designing structures distinctively suited to their
place in history. Positioning Taylor's extensive designs within the
context of his time, The Architecture of Andrew Thomas Taylor
firmly establishes his work as a cornerstone of Canadian
architecture.

Exporting American Architecture 1870-2000-Jeffrey W. Cody
2005-06-27 The export of American architecture began in the
nineteenth century as a disjointed set of personal adventures and
commercial initiatives. It continues today alongside the transfer
of other aspects of American life and culture to most regions of
the world. Jeffrey Cody explains how, why and where American
architects, planners, building contractors and other actors have
marketed American architecture overseas. In so doing he
provides a historical perspective on the diffusion of American
building technologies, architectural standards, construction
methods and planning paradigms. Using previously
undocumented examples and illustrations, he shows how steel-
frame manufacturers shipped their products abroad enabling the
erection of American-style skyscrapers worldwide by 1900 and
how this phase was followed by similar initiatives by companies
manufacturing concrete components.

New York Magazine- 1992-12-07 New York magazine was born in
1968 after a run as an insert of the New York Herald Tribune and
quickly made a place for itself as the trusted resource for readers
across the country. With award-winning writing and photography
covering everything from politics and food to theater and fashion,
the magazine's consistent mission has been to reflect back to its
audience the energy and excitement of the city itself, while
celebrating New York as both a place and an idea.

@Tuambabies: A Critical Look At the Tuam Children's Home Scandal-Brian Nugent 2018-10-08 In the summer of 2014, and later again in spring 2017, a scandal arose in relation to the Tuam Children's Home in Galway in Ireland. It was alleged that the nuns who looked after children there from 1925-61 had maltreated them. This second edition book casts a critical eye on the local history methodology underpinning the scandal. It examines in detail: the mapping of the burial sites; the statistical traps overlooked; the widely misinterpreted 2017 statement of the Mother and Baby Commission; the Oral History of the Home; and the vexed questions of money and food. Extensive appendices also expand on the recorded history of the Home, the personnel employed there, three detailed eyewitness accounts, and a comprehensive history of the Tuam workhouse. It also contains a valuable foreword by Fr Paul Churchill.

Counterterror Initiatives in the Terror Finance Program-United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs 2005

Money Matters-Rory Keane 2015-09-18 Although the financial sustainability of United Nations (UN) support to institutional capacity building in post-conflict contexts may be the least analysed topic on the peacebuilding agenda, understanding the costs of rebuilding and maintaining the security sector should be one of the most important priorities for security sector reform (SSR) practitioners today. Through innovative partnerships
between the UN and the World Bank, a new and important practice area in public financial management of the security sector is beginning to take shape. This paper traces the new demands placed on peacekeeping operations to “get more bang for every peacekeeping buck”, and explores how to match SSR priorities and recurring costs in the security sector with available resources over the long term. In presenting the lessons learned from the security sector public expenditure review conducted by the UN and the World Bank in Liberia in 2012, the first such review jointly undertaken by the two organizations, the paper seeks to illustrate how the discussion on right-sizing of the security sector can go hand in hand with a discussion on right-financing in order to help prioritize key reforms pragmatically in light of the available fiscal space. Specifically, the paper provides SSR practitioners with insights into the challenges often encountered when assisting national authorities to address the political economy of SSR, and how to navigate those dilemmas.

Money Matters (to God)-J. Bradley Van Vleet Jr. 2021-03-16 I know what you're thinking: "Another book on money!" And you're right, this is another book on money, but it's probably not quite from the angle that you're thinking. Money Matters (to God) is a book about seeing finances through the eyes of God instead of the eyes of society. Through this book, we will walk through the scripture to see what the Bible actually has to say about money and how we should use it. You may be surprised to see what's there. Money is an important topic to God. You can clearly see that through the Old and New Testaments. Jesus talked more
about money than He did about heaven or hell. Money is important to God simply because it's important to us. Sometimes too important. My prayer is that, through this book, you will be able to shed the burden of financial stress through priority and perspective.

Topical Issues in Pain 2-Louis Gifford 2013-09 This is the second volume in the series stimulated by/deriving from the work and study days of the Physiotherapy Pain Association. This volume is about some fundamental changes in practice which aim to prevent chronic incapacity from musculoskeletal pain problems. It is also about our relationships with our patients, and theirs with their pain and their families. As such, the information provided is essential to all professions involved in physical rehabilitation and prevention of chronic incapacity. When practice changes there is a necessary extension of traditional thinking into new territories and new skills to be taken on. In particular, all the chapters in this book underline the recognition that while musculoskeletal pain has a biomedical origin, there are also important psychosocial components that require management within a biopsychosocial framework. Authors provide background knowledge and practical guidance to help readers integrate the biopsychosocial model and biopsychosocial assessment into patient management. The material in this book is as important to the management of acute pain as it is to chronic pain states. Importantly, the book is not about categorising patients as having either real or not real pain. It represents a determined effort by all the authors to present clinicians with tools that will help them to better understand their patients; help prevent them becoming disabled, and help most to lead far more active and productive lives - no matter how complex the presentation. Volumes in the Topical Issues in Pain series are written by clinicians for clinicians. Each volume reviews the literature and presents best practice in a lively and understandable text. All clinicians will benefit from the straightforward advice. I look forward to this
series and to the activities of the Physiotherapy Pain Association because they promise to revolutionise the morale, dignity and way of thinking of physiotherapists and thereby to affect everyone concerned with pain. Patrick Wall Physiotherapy 95(2):101-2
