Collision Course-Kerryn Higgs 2016-08 The story behind the reckless promotion of economic growth despite its disastrous consequences for life on the planet. The notion of ever-expanding economic growth has been promoted so relentlessly that "growth" is now entrenched as the natural objective of collective human effort. The public has been convinced that growth is the natural solution to virtually all social problems—poverty, debt, unemployment, and even the environmental degradation caused by the determined pursuit of growth. Meanwhile, warnings by scientists that we live on a finite planet that cannot sustain infinite economic expansion are ignored or even scorned. In Collision Course, Kerryn Higgs examines how society's commitment to growth has marginalized scientific findings on the limits of growth, casting them as bogus predictions of imminent doom. Higgs tells how in 1972, The Limits to Growth--written by MIT researchers Donella Meadows, Dennis Meadows, Jorgen Randers, and William Behrens III--found that unimpeded economic growth was likely to collide with the realities of a finite planet within a century. Although the book's arguments received positive responses initially, before long the dominant narrative of growth as panacea took over. Higgs explores the resistance to ideas about limits, tracing the propagandizing of "free enterprise," the elevation of growth as the central objective of policy makers, the celebration of "the magic of the market," and the ever-widening influence of corporate-funded think tanks--a parallel academic universe dedicated to the dissemination of neoliberal principles and to the denial of health and environmental dangers from the effects of tobacco to global warming. More than forty years after The Limits to Growth, the
idea that growth is essential continues to hold sway, despite the mounting evidence of its costs—climate destabilization, pollution, intensification of gross global inequalities, and depletion of the resources on which the modern economic edifice depends. Collision Course—Joseph A. McCartin 2011-10-06 In August 1981, the Professional Air Traffic Controllers Organization (PATCO) called an illegal strike. The new president, Ronald Reagan, fired the strikers, establishing a reputation for both decisiveness and hostility to organized labor. As Joseph A. McCartin writes, the strike was the culmination of two decades of escalating conflict between controllers and the government that stemmed from the high-pressure nature of the job and the controllers' inability to negotiate with their employer over vital issues. PATCO's fall not only ushered in a long period of labor decline; it also served as a harbinger of the campaign against public sector unions that now roils American politics. Now available in paperback, Collision Course sets the strike within a vivid panorama of the rise of the world's busiest air-traffic control system. It begins with an arresting account of the 1960 midair collision over New York that cost 134 lives and exposed the weaknesses of an overburdened system. Through the stories of controllers like Mike Rock and Jack Maher, who were galvanized into action by that disaster and went on to found PATCO, it describes the efforts of those who sought to make the airways safer and fought to win a secure place in the American middle class. It climaxes with the story of Reagan and the controllers, who surprisingly endorsed the Republican on the promise that he would address their grievances. That brief, fateful alliance triggered devastating miscalculations that changed America, forging patterns that still govern the nation's labor politics. Written with an eye for detail and a grasp of the vast consequences of the PATCO conflict for both air travel and America's working class, Collision Course is a stunning achievement. Collision Course with God-Robert Foust 2013-03 Whether your teen is a slight problem or a nightmare, you can learn from my experiences raising a teenage sociopath. There is always hope, with God?s help. God can give you peace, even when your life is in chaos. In light of recent events, Americans are looking more at the complex reasons that cause shootings. A significant number place the blame with parents not paying enough attention to their children, and of course, mental illness. It has been shown from previous shootings that usually these young people feel like outsiders because they don?t have a peer group?s respect and support, and they felt unloved at home. Love is one primary inhibitor to bad behavior. I show in my book that there are three primary inhibitors that will make a difference with the behavior of most children. With our complicated lives, all the distractions and demands on each of us, we have to make the most of the time we have with our children. If the influence of the three primary inhibitors is not being felt by your children, then they may not have moral restraints to prevent bad choices.

Collision Course-Hugh Davis Graham 2003-09-11 When the Civil Rights Act of 1964 and the Immigration and Naturalization Act of 1965 were passed, they were seen as triumphs of liberal reform. Yet today affirmative action is foundering in the great waves of immigration from Asia and Latin America, leading to direct competition for jobs, housing, education, and government preference programs. In Collision Course, Hugh Davis Graham explains how two such well-intended laws came into conflict with each other when employers, acting under affirmative action plans, hired millions of new immigrants ushered in by the Immigration Act, while leaving high unemployment among inner-city blacks. He shows how affirmative action for immigrants
stirred wide resentment and drew new attention to policy contradictions. Graham sees a troubled future for both programs. As the economy weakens and antiterrorist border controls tighten, the competition for jobs will intensify pressure on affirmative action and invite new restrictions on immigration. Graham's insightful interpretation of the unintended consequences of these policies is original and controversial.

Collision Course-S. C. Stephens 2012-04-11 Lucas had it all—popularity, a devoted girlfriend, a brotherly best friend, and a loving mother who would do anything for him. His life was right on course to be successful and fulfilling...until the crash changed everything. Late at night, during a sudden downpour, three young lives are lost and Lucas, the lone survivor, is left to face the consequences. Surrounded by swirling gossip as to what really happened that fateful evening, Lucas now finds himself an outcast. Shunned by former friends, condemned by the people of his small town, and riddled by his own guilt and self-hatred, he struggles to find hope, find peace, and maybe, even find love.

Collision Course-C. P. Rowlands 2010 Brie O'Malley's successful life as author and college professor fell apart when the woman she loved was killed. Carpenter and business owner Jordan Carter has also struggled to pull her life together after a tragedy. Now both women must decide if a second chance at love is worth more than hanging onto the past?

Collision Course-Robert L. Maginnis 2020-07-15 Collision Course demonstrates that the United States was founded by Christians seeking religious freedom and economic opportunity - a grand experiment that made the common man "king." Those new world immigrants brought with them a Christian worldview marked by a robust Protestant work ethic and an entrepreneurial spirit that prospered in the wilds of America's unchartered capitalistic economy that eventually made the European franchise the envy of the world. The backbone of that exceptional success was her Christian foundation that nourished critical institutions - family, religion, government, education and economy. However, as the history of past empires demonstrates, most often the founding ingredients wear thin and now, two and a half centuries later, America finds herself at a moral tipping point having abandoned much of her original Christian influence. Collision Course tracks...
America's approaching moral tipping point which demands a call for an emergency renewal - a true repentance - to change course in order to avoid being relegated to the dust bin of history and end times irrelevancy. Collision Course in 14 chapters:-Establishes America's Christian heritage, not a theocracy but a nation that was significantly bred on Christian precepts.-Demonstrates that America's defining institutions embraced Christian principles and values, the key to her exceptional prosperity.-Shows that the Father of lies and his cabal of evil proxies aggressively watered-down Christianity's influence. -Identifies those contemporary evil proxies by name and how they brought America to the present moral tipping point.-Profiles a movement now rising to oppose the threat to America's future.-Provides a comprehensive strategy to save America from falling over the moral tipping point by making her more Christian again.

Collision Course-Paul Manna 2010-10-12 What happens when federal officials try to accomplish goals that depend on the resources and efforts of state and local governments? Focusing on the nation's experience with the No Child Left Behind Act (NCLB), Manna's engaging case study considers just that question. Beyond the administrative challenges NCLB unleashed, Collision Course examines the dynamics at work when federal policymakers hold state and local governments accountable for results. Ambitions for higher performance collide with governing
structures and practices. Were the collisions valuable for their potential to transform education policy, or has the law inflicted too much damage on state and local institutions responsible for educating the nation's youth? The results have been both positive and negative. As Manna points to increased capabilities in states and localities, he also looks at expanded bureaucratic requirements. Collision Course offers a balanced and in-depth assessment of a policy that has sparked heated debate over a broad expanse of time—from NCLB's adoption through its implementation to the Obama administration's attempts to shift away. Federalism, the policymaking process, and the complexity of education policy all get their due in this accessible and analytical supplement.

America's Coming War with China-Ted Galen Carpenter
2015-03-31 One issue could lead to a disastrous war between the United States and China: Taiwan. A growing number of Taiwanese want independence for their island and regard mainland China as an alien nation. Mainland Chinese consider Taiwan a province that was stolen from China more than a century ago, and their patience about getting it back is wearing thin. Washington officially endorses a "one China" policy but also sells arms to Taiwan and maintains an implicit pledge to defend it from attack. That vague, muddled policy invites miscalculation by Taiwan or China or both. The three parties are on a collision course, and unless something dramatic changes, an armed conflict is virtually inevitable within a decade. Although there is still time to avert a calamity, time is running out. In this book, Carpenter tells the reader what the U.S. must do quickly to avoid being dragged into war.

Titanic #2: Collision Course-Gordon Korman 2011-08-01 From bestselling author Gordon Korman, a second heart-stopping adventure aboard the unluckiest ship of all. The Titanic has hit the high seas--and moves steadily toward its doom. Within the
luxury of the cabins and the dark underbelly of the ship, mysteries unfold—a secret killer who may be on board, a legacy that may be jeopardized, and a vital truth that will soon be revealed. For Paddy, Sophie, Juliana, and Alfie, life on the Titanic brings both hiding and seeking, as their lives become irrevocably intertwined. And then, of course, an iceberg appears, and the stage is set for the final scene.

Collision Course-Greg Farshtey 2013-01-01 When the space ship Valiant is taken over by a swarm of brains that can control the minds of anyone they touch, it heads on a collision course with the Hero Factory, and it is up to Stormer, Rocka, and Breez to stop the ship and save the world.

Collision Course-Jason Henderson 2016-09-07 The true story of two elite runners and a disastrous race at the 1984 Los Angeles Olympics. The Olympic crowds—as well as millions of viewers at home—were looking forward to watching South African-born barefoot runner Zola Budd, representing Britain, in competition against the American favorite Mary Decker. But as the two ran in close proximity during the 3000-meter race in Los Angeles, disaster struck. Decker tumbled to the inside of the track after her legs tangled with Budd’s while the two competed for pole position. A distraught and frustrated Decker, unable to carry on, watched in tears as Maricica Puica of Romania stormed to gold while Budd, who was heavily booed by the partisan crowd in the closing stages, faded to seventh. Using the famous Olympic moment as its focal point, Collision Course tells the story of two of the best-known athletes of the twentieth century, analyzes their place in history as pioneers of women's sport, and lifts the lid on two lives that have been filled with sporting and political intrigue that, until now, has never been fully told.

China’s India War-Bertil Lintner 2018-01-25 The Sino-Indian War of 1962 delivered a crushing defeat to India: not only did the country suffer a loss of lives and a heavy blow to its pride, the world began to see India as the provocateur of the war, with
China ‘merely defending’ its territory. This perception that China was largely the innocent victim of Nehru’s hostile policies was put forth by journalist Neville Maxwell in his book India’s China War, which found readers in many opinion makers, including Henry Kissinger and Richard Nixon. For far too long, Maxwell’s narrative, which sees India as the aggressor and China as the victim, has held court. Nearly 50 years after Maxwell’s book, Bertil Lintner’s China’s India War puts the ‘border dispute’ into its rightful perspective. Lintner argues that China began planning the war as early as 1959 and proposes that it was merely a small move in the larger strategic game that China was playing to become a world player—one that it continues to play even today.

Collision Course-Susan Nichols Ferrara 2003-09 In Collision Course, a world-renowned astronomer, Dr. Selena Hartmann, spins toward the precipice of world destruction with scientific knowledge that could simultaneously save the world and destroy her family. Dr. Hartmann believes the consequences of launching a Star Wars-type defense program could be disastrous for our planet. Her visible enemies are the combined forces of big business and politics — the military-industrial complex. But it is the hidden agenda of a supposed ally that proves far more sinister. In Collision Course, real-time science dovetails with a highly charged plot, a cast of extraordinary characters, and break-neck pacing. From a mountaintop in the French Alps to the beaches of Hawaii and “King Keck,” the world’s greatest observatory, the excitement culminates at the site of a billion-dollar, super-colliding superconductor in Chile where a visionary developer plans a mission so treacherous that Carl Sagan warned
against it in his book, Pale Blue Dot.

Collision Course-Hans Greimel 2021-06-22 In Japan it's called the "Ghosn Shock"—the stunning arrest of Carlos Ghosn, the jet-setting CEO who saved Nissan and made it part of a global automotive empire. Even more shocking was his daring escape from Japan, packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center, subsisting on rice gruel. This is the saga of what led to the Ghosn Shock and what was left in its wake. Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business, but the alliance's shiny image fronted an unsteady, tense operation. Culture clashes, infighting among executives and engineers, dueling corporate traditions, and government maneuvering constantly threatened the venture. Journalists Hans Greimel and William Sposato have followed the story up close, with access to key players, including Ghosn himself. Veteran Tokyo-based reporters, they have witnessed the end of Japan's bubble economy and attempts at opening Japan
Inc. to the world. They've seen the fraying of keiretsu, Japan's traditional skein of business relationships, and covered numerous corporate scandals, of which the Ghosn Shock and Ghosn's subsequent escape stand above all. Expertly reported, Collision Course explores the complex suspicions around what and who was really responsible for Ghosn's ouster and why one of the top executives in the world would risk everything to escape the country. It explains how economics, history, national interests, cultural politics, and hubris collided, crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan. This gripping, unforgettable narrative, full of fascinating characters, serves as part cautionary tale, part object lesson, and part forewarning of the increasing complexity of doing global business in a nationalistic world.

Collision Course-Matt Hilton 2020-11-01 Private investigator Tess Grey feels duty bound to help when the missing girl she has been asked to find becomes involved in a high-stakes case of extortion. Tess Grey's latest case involves tracking down Hayley Cameron, a young girl who has fled after discovering that she was adopted. Tess, aided by her fiancé Po Villere, traces Hayley to the apartment of Madison Toner - one of Hayley's college friends - in Bangor, Maine. Despite Tess's pleas, Hayley refuses to return to her adoptive mother. Both Tess and Po believe there's more to her running away than it seems, especially when they see Madison's father bloodied and beaten. Concerned for Hayley's well-being, they conduct a stake-out. When thugs turn up to extort Madison and Hayley, Tess and Po feel duty bound to get involved. But what are the girls embroiled in? Who are after them and to what lengths will they go? Tess and Po don't know it yet, but events are about to grow deadly.

The Servant-Joe Matlock 2021-03-07 Thugs have continuously monitored and planned for months to kidnap Tiffany Wells, a bratty, young star. However, the one person they never saw coming is Terry Spooner. Terry is a former soldier and mercenary
turned seminary student. His former team-leader, Nigel Corbyn convinces him to temporarily work with Ms. Wells' personal security team. Terry reluctantly agrees with one proviso: he will not carry a gun. After the armed thugs' attempt is thwarted single-handedly by Terry, he returns to the seminary. However, Tiffany Wells demands that the humble hero come back at any price. So, Nigel pitches an offer to Terry. He broods and prays with fellow students over it, wondering if the Lord wants him to do this. Terry relents and agrees. During a film shoot in Africa, she is taken captive by some Juluka tribe members who intend to sell her and other captives in a slave market. Can Terry save Tiffany again?

Collision Course-K. A. Mitchell 2009-11 Immovable object? Meet the irresistible force. Paramedic Aaron Chase doesn't have anything against love. It just comes with a lot of responsibility, like when he had to raise his sister and brothers after their drug-addicted mom took off for good. Now that the last one is off to college, Aaron's anticipating enjoying life on his own terms. He certainly wasn't expecting Joey Miller to accidentally drop into his life. Joey's sexy, funny and annoyingly optimistic, and his tendency to get into trouble keeps sending him Aaron's way. Even the fact that Joey works for the hated social work system isn't reason enough to keep him out of Aaron's bed. Joey knows all about love. He's fallen in it ten times—he thinks. It's not that he can't tell the difference between sex and love. All that experience has to count for something, right? With Aaron it's different. Maybe because there's something to fight for. This time Joey's fallen for good. He's not going to let number eleven get away. Warning: This love story may overheat readers or the devices used to read it. Explicit male/male sex scenes involving extra penetration, toys, and spanking.

Collision Course-Joyce Halliday 2001-12-01
Collision Course-Robert C. Dickeson 2004 One of the most critical issues affecting higher education access today is the rising cost of going to college. Symptoms of the trend include dramatic increases in tuition and fees, reduced state higher education budgets, declines in the purchasing power of student grant aid, increasing student debt burdens and heightened demand for institutional accountability. Left unchecked, the real and perceived cost spiral can have serious consequences. It can limit access and lifetime opportunity for aspiring college students, particularly low-income students, thereby threatening America's future in the global, knowledge-based economy. Unfortunately, dialogue about the issue has become counterproductive. Harsh proposals and counterproposals and arguments about who's to blame add to the divisive nature of this topic. To raise the dialogue to a more constructive level, Lumina Foundation for Education proposes an initiative to improve discourse and find shared solutions. It turns out that practical, low-cost solutions to this problem exist and are available for shared implementation. Additional creative solutions are sure to be found when people come together for the common good. This policy brief proposes to be a first step in that process. It provides essential background, and then identifies potential strategies that stakeholder groups might consider in addressing the issue. (Contains 2 tables and 33
